HORTICULTURE

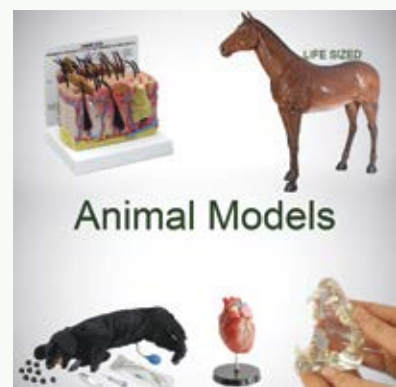

Many careers launch from a foundation of Horticulture studies. Your Horticulture program needs modern equipment from AG Educational Solutions to keep it current and applicable to the most motivated Horticulture students. To create an updated and complete Horticulture program, use only the best brands to outfit your lab with equipment and technology to pave the way for your Horticulture students. Students pursuing Forestry, Agriculture studies, Horticulture, Landscape Architecture, and Arboriculture need a comprehensive lab to give them hands-on access to the best educational opportunities available in today's competitive market. Choose AG Educational Solutions to outfit your Horticulture classroom with only the best training aids and learning tools.

PLANT & ANIMAL SYSTEMS

To help your Plant & Animal Systems Program flourish, build it from the ground up with updated training aids, hands-on curriculum, and the highest quality classroom tools available from AG Educational Solutions. With graduates heading into a variety of diverging career paths, the Plant & Animal Systems program must rely on classroom experience that is thorough, cutting-edge, and foundational to their chosen field. AG Educational Solutions provides the highest quality training aids such as Animal Models, Grooming Kits, Microscopes, Incubators and much more. Outfit your school with the best educational tools on the market to build a Plant & Animal Systems Program that will stand above the rest.

BIO SYSTEMS ENGINEERING TECHNOLOGY

Does your Bio Systems Engineering Technology Program need a boost? Find the best training aids available from AG Educational Solutions. Our line of high-quality lab equipment, supplements, and training aids will provide the best possible foundation for Bio Systems Engineering Technology Students to get a leg up in today's competitive learning environment. Bio Systems Engineering Technology is a highly specialized and technical field that requires strong hands-on skills dealing with all living systems, energy, and even animals. Give your instructors everything they need to produce a generation of Bio Systems Engineering Technology Students who are well equipped, confident, and ready for success.

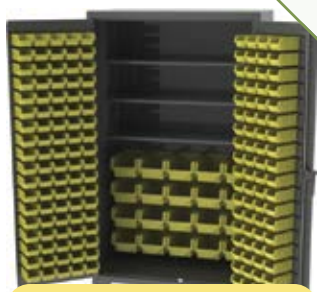

FURNITURE

Part of the first impression of any educational institute is the presentation of offices, communal areas, and entry ways. From work stations, to storage, drafting tables to cabinetry, be sure your Furniture is helping create a professional environment for students and visitors observing your facility. Explore Furniture choices that send the right message from the start with quality options such as our Dura-Tech Series, CB-Series, and commercial quality Furniture you can count on for the entire campus. Look for quality workmanship, attractive design, and innovative options from the best educational furniture AG Educational Solutions has to offer.
