

GREENHOUSE GROWING TABLE – 60” W

Description

Designed to keep soils organized and off the floor while putting your arrangements together. The sturdy formed channel base features a galvanized steel work surface and upper riser shelf. Included are (3) soil bins and (1) trash receptacle. The work surface has a trash hole to allow excess soils to be cleared to the trash receptacle. The work surface has a trash hole to allow excess soils and waste to be cleared into the trash receptacle. The workstation is available with a fixed or portable base. This is a great worktable for Landscape/Design or Horticulture programs.
